Historical One-Shot-OPD project M4: online multi-prompt DAPO, 64 rollouts per update
BF16, AdamW, response cap 7168; 279 logged steps per run; all analysis on CPU

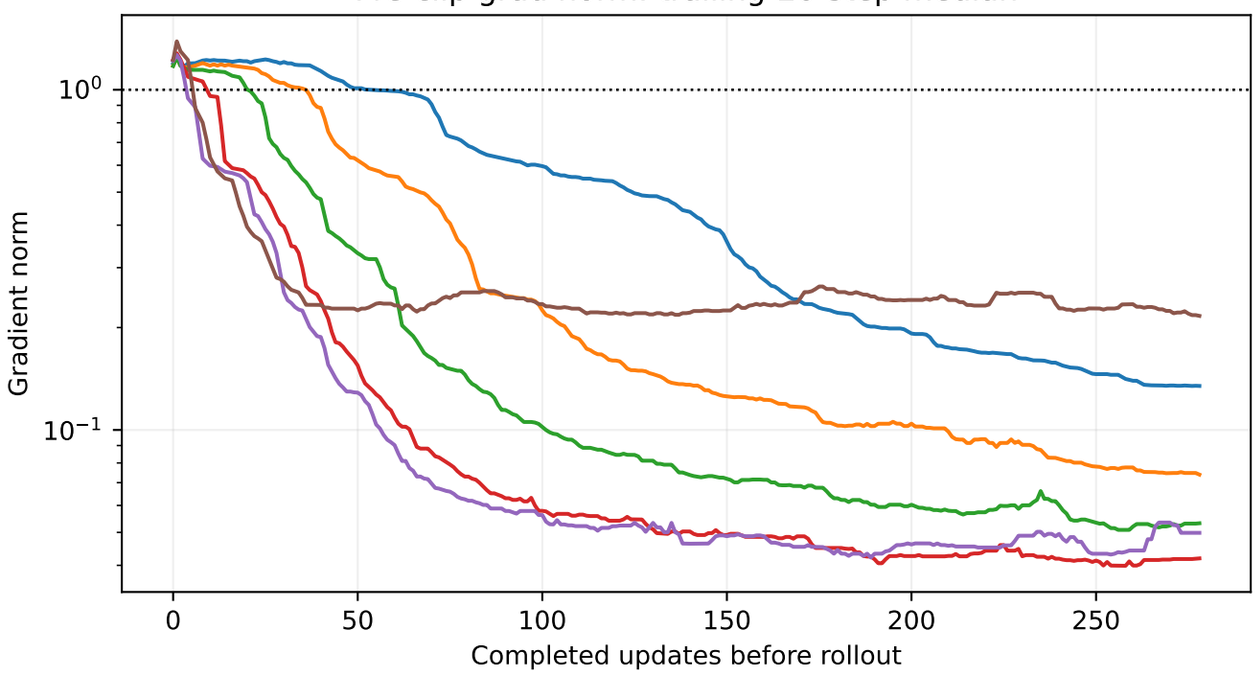

Sampled reverse-KL proxy vs update count

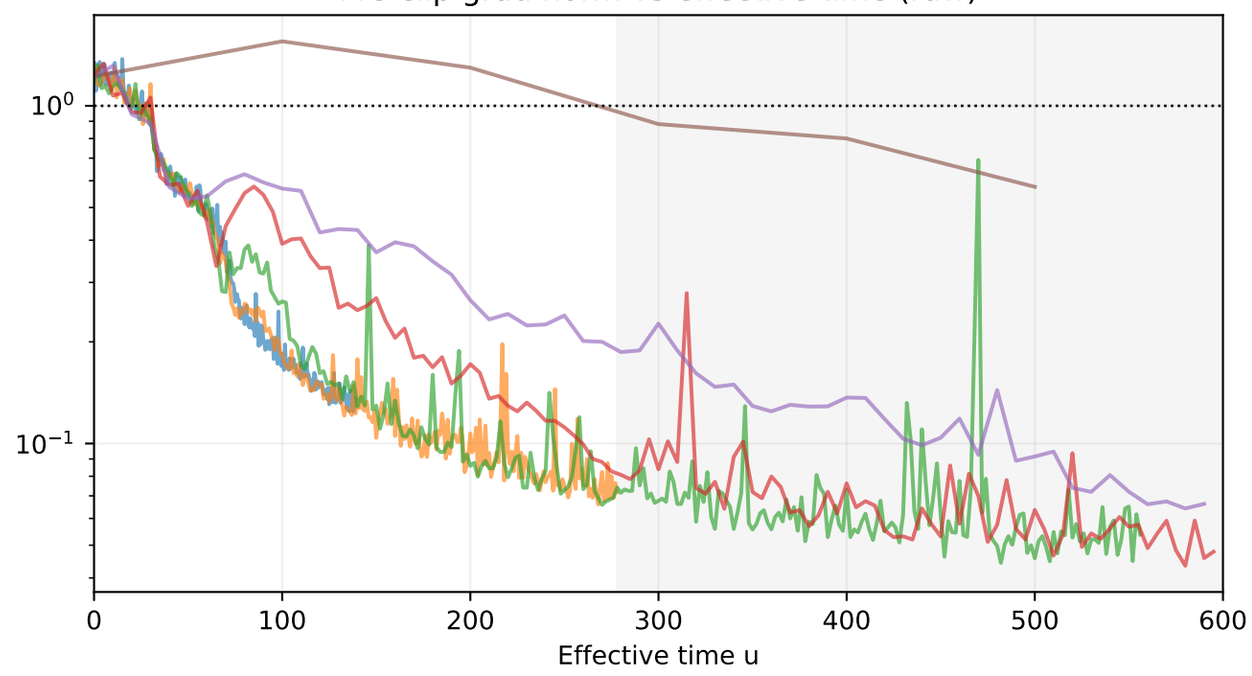

Effective time: low-LR fit, held-out LR tests

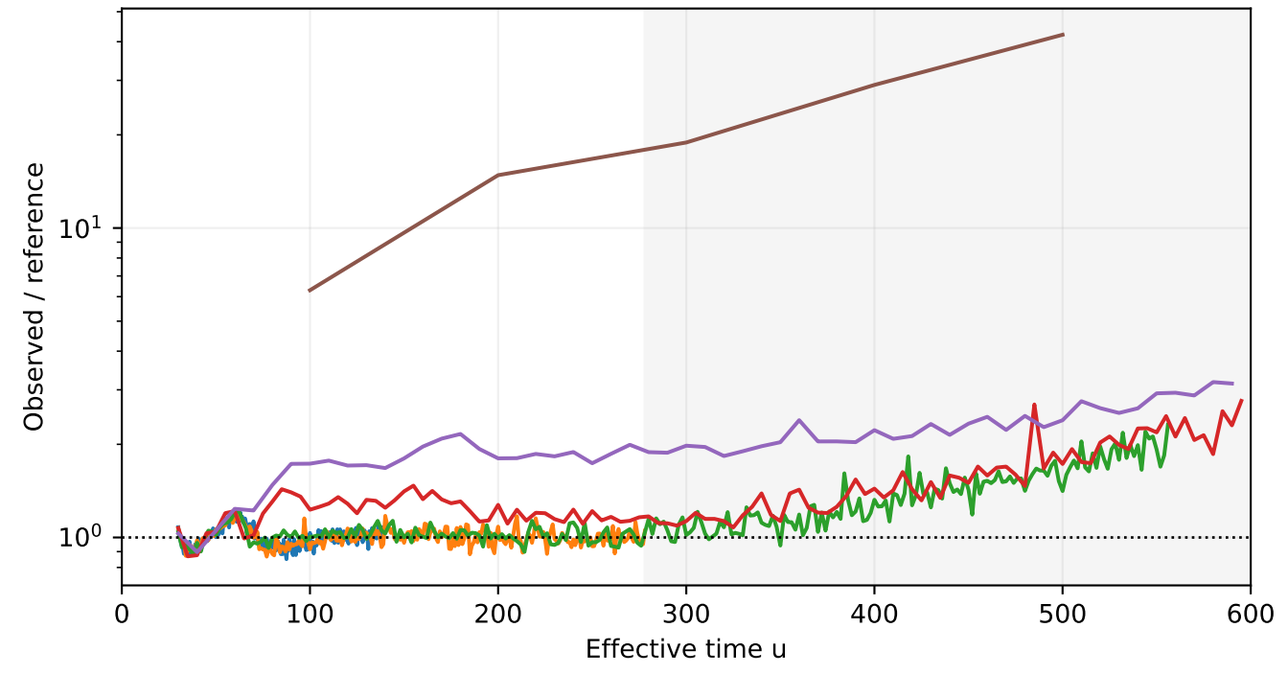

Pre-clip grad norm: trailing-20-step median

Pre-clip grad norm vs effective time (raw)

Observed proxy / low-LR reference

Late distance vs LR; untested interval retained
